CAREER SUMMARY

Data Analyst with **3+ years of experience** designing Business Intelligence solutions and transforming large-scale transactional data into actionable business insights. Proficient in **SQL, Power BI, Python, Excel, Data Modelling, and Data Visualization**, with hands-on experience in Customer Analytics, Financial Analytics, KPI Reporting, Dashboard Development, and Business Performance Analysis **across Retail, Finance, and EdTech domains**. Experienced in building scalable SQL pipelines, automating reporting workflows, and leveraging Generative AI to accelerate analytics and insight generation while ensuring data accuracy and data quality. Skilled in translating complex business problems into scalable analytics solutions that drive informed business decisions.

SKILLS

Key Skills: Agile/Scrum, DBMS Programming, Data Pre-processing, Data Analysis, Strategy Development, Reporting, Visualization, Advanced Analytics, Customer & Product Analytics, Predictive Analytics, Business Intelligence

Business Intelligence: Power BI, Tableau, Excel, DAX, Power Query, Microsoft Fabric, Hadoop.

Databases: SQL Server, PostgreSQL, MySQL.

Analytics: Data Modelling, ETL, EDA, KPI Reporting, Customer Segmentation, Revenue Analytics.

Business Domains: Digital Commerce, Customer Analytics, Business Performance Reporting, EdTech.

Programming & Querying: SQL (Advanced), Python

Statistics & Machine Learning: Hypothesis Testing, Time Series Analysis, Predictive Modelling.

Libraries: Pandas, NumPy, Matplotlib, Seaborn,

Generative AI: ChatGPT, Claude, Gemini, GitHub Co-pilot | AI-assisted SQL, documentation, and data analysis.

EXPERIENCE

Data Analyst | Tata Consultancy Services | Hyderabad, India

Jan 2023 – Nov 2024

Digital Customer Engagement & Retention Analytics

Domain: Digital Commerce

- Analysed **£8.9M+** in customer transaction data to identify purchasing patterns, customer lifetime value (CLV), and revenue trends, supporting customer retention and revenue optimization.
- Developed an **SQL-based RFM Customer Segmentation Model**, classifying customers into 5 behavioural segments that enabled targeted marketing and retention strategies.
- Designed and optimized a **star schema** and built scalable SQL pipelines using **CTEs, Window Functions, Joins, and Aggregations**, improving data quality and dashboard performance.
- Leveraged **Generative AI** to accelerate SQL query development, DAX calculations, and technical documentation while validating outputs to ensure analytical accuracy.
- Built interactive Power BI dashboards tracking Revenue, Customer Count, Average Order Value (AOV), Order Volume, Customer Retention, and segment-wise revenue contribution for business stakeholders.

- Applied RFM scoring to identify **the Top 20% Revenue-Generating Customers** and establish **Churn-Risk Indicators** from Purchase Recency and Frequency, enabling targeted loyalty campaigns and proactive retention efforts.
- Automated recurring KPI reporting and performed data validation to improve reporting accuracy, consistency, and operational efficiency.
- Collaborated with **cross-functional stakeholders** to translate business requirements into scalable Business Intelligence dashboards and actionable insights.

Business Analyst | Platinum | Nagpur, India

Dec 2024 - July 2026

EdTech Customer Growth & Engagement Analytics

Domain: EdTech.

- Analysed **1,800+ admission enquiries** and student records using **SQL** and **Excel** to identify trends in parent interest, enquiry sources, follow-ups, and admissions.
- Developed interactive Power BI dashboards to track key metrics related to admissions, **student attendance**, **academic performance**, and **fee collection**.
- Performed admission funnel analysis across 5 stages, from initial parent enquiry to final enrolment, to identify conversion patterns and drop-off points.
- Cleaned, transformed, and consolidated data from 10+ Excel files and administrative records to **create structured datasets** for reporting and analysis.
- Monitored attendance and academic performance data for **500+ students** across multiple classes, identifying trends and supporting regular management reporting.
- Analysed enquiry sources, class-wise demand, and conversion rates to support admission planning and parent outreach activities.
- **Automated recurring** reporting processes through Power BI dashboards and reusable data models, reducing manual effort in report preparation.
- **Collaborated** with admissions staff, teachers, and school management to gather reporting requirements and deliver monthly and admission-cycle reports.

RELEVANT PROJECTS

Generative AI Business Intelligence Assistant

Generative AI

Python • SQL • Power BI • LLMs

- Developed an AI-powered analytics assistant that converts natural language questions into SQL queries and generates automated business insights.
- Integrated LLMs to create executive-ready KPI summaries and dashboard narratives, reducing manual reporting effort while ensuring output validation.
- Validated AI-generated SQL queries and analytical insights against business rules to ensure accuracy and reliability.

EDUCATION

Master of Computer Application (MCA)

Sikkim Manipal University

Aug 2025 – Present

Bachelor of Computer Application (BCA)

R.T.M Nagpur University

July 2020 – June 2023
